EXPERIENCE

Freelance

Developer / Tech Consultant

- Designed and developed full-stack web applications using modern frameworks.
- Evaluated and recommended technology stacks tailored to client needs, considering scalability, performance, and maintainability.
- Managed end-to-end project lifecycles — from requirements gathering and technical architecture to deployment and post-launch support.

PERSONAL PROJECTS

• FI Group of Institutions LMS Portal | Demo

Developed a secure, comprehensive LMS portal that uses role-based access control for students, professors, and administrators.

– Tools & libraries: Next.js, Prisma (PostgreSQL), MinIO, NextAuth.js, Google APIs, Nginx, PM2, DigitalOcean, GitHub Actions

– Key features: Implemented granular role-based access control, user management, course material sharing, detailed attendance tracking, fee management, academic event scheduling, help ticket system, notices, library catalog and integrated calendar / email functionalities. Configured automated CI/CD deployment pipeline.

• VITLAA – VIT Chennai | GitHub Repository Link | Demo

Designed a responsive workshop website for Linear Algebra event with registration, schedule, and speaker details.

– Tools & libraries: React.js, SCSS, HTML

– Created a modern user interface with speaker profiles, schedule carousel, and smooth navigation.

• LegalAI | GitHub Repository Link | Demo

Automated legal document processing with translation, sentiment analysis, and audio narration.

– Tools & libraries: AWS Comprehend, Translate, Polly, Hugging Face API

– Enabled accessibility via multilanguage support and voice output for legal documents.

• Rescue and Reconnaissance Bot (RRBot) | GitHub Repository Link

Built a disaster-survivor detection bot using real-time image and GPS data with the emergency SMS alert system.

– Tools & libraries: YOLOv5, ESP32-CAM, Supabase, Vonage SMS API

– Enabled real-time image detection, GPS tracking, and automatic emergency alerts for search-and-rescue operations, integrated with a custom-built robotic car for camera and sensor feed-based navigation.

EXTRACURRICULAR

GDSC - VITC

Core Team - Web Developer

– Contributed to the development of the hackathon website (DevsHouse 2024) at VITC.

– Upgraded the official GDSC VITC website from Next.js version 12 to 13, implementing app-based routing for better performance and scalability.

SKILLS AND TOOLS

- **Languages & Frameworks:** Python, C++, Java, TypeScript, JavaScript, React.js, Next.js
- **Web Development:** HTML, CSS, Tailwind CSS, shadcn/ui, Node.js, REST APIs
- **Database & DevOps:** PostgreSQL, Prisma, Git, GitHub Actions, DigitalOcean, Nginx, PM2, MinIO (S3)
- **Core Concepts:** Data Structures, Algorithms, OOP, DBMS, API Design
